

BRG-200DR

Product Data H. F. X-ray generator

Advanced technology high frequency x-ray generator for digital and general radiology in any medical centre.

Microprocessor-controlled unit, for safe and reliable operations.

MAIN FEATURES

- Three different models: 50 kW - 65 kW - 80 kW
- High frequency Output up to 400kHz
- High Speed Starter, for higher power
- Low kV ripple, maximizes image quality by providing constant potential performance at a fraction of the cost of more expensive models
- Small, compact, light weight and high proven reliability units
- User-friendly units, with operative parameters selected and visualized on an ergonomic display
- Large technique selection:
 - 1) kV with AEC (option)
 - 2) kV / mAs
 - 3) kV / mA/ Time
 - 4) kV / cm thickness (optional only with membrane console)
- Simple-to-use APR operation, with manual override of technique factors
- Anatomical programs available in several languages and easily edited
- Mini-console for a seamless integration with the Digital Imaging System
- Operator Membrane Control Console available as an option with international symbols or text
- Automatic X-ray tube Calibration
- GenWare™ Service Software allows fast and easy set-up with extensive self-diagnostic with operator prompt messages, as well as system diagnostic for all off-size analysis.
